Screens for modern Australian living

NEW!

“ I can't believe how Freedom Magnetic Flyscreens not only solved our insect problems forever, they look stylish and were installed with the minimum of fuss. I would thoroughly recommend Freedom Magnetic Flyscreens! *Andy G* ”

KEEP THE BUGS OUT

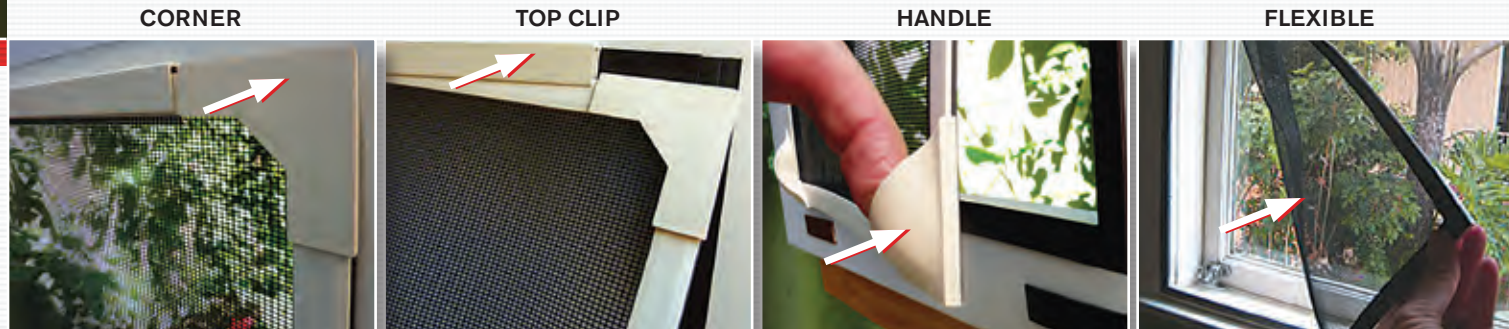

AND LET THE VIEW IN

Freedom Screens is an Australian company dedicated to being at the forefront of commercial and residential insect and bushfire screen technology.

We have a long and trusted reputation, and pride ourselves on quality and customer satisfaction.

Established in 1999 on the beautiful Gold Coast, in Queensland, Australia. Freedom Screens has now grown to be an Australian industry leader with 13 stores nationwide.

It is our dedication to innovation and quality that has allowed us to grow and be accepted as a measure of quality in insect screen development on the national and international market.

Freedom magnetic flyscreens are almost invisible and adapt to a variety of difficult to screen windows.

They blend perfectly for casement windows, awning or hopper windows requiring internal screens while still providing easy access to operate and clean your windows.

- Simply peel back to open and close your window, the screen is instantly removable and fully washable.
- Ideal for windows with security bars and grilles.
- Suitable for all frame materials including wood & aluminium via self adhesive magnetic base strips.
- Safety is a concern for windows requiring ladder access, magnetic screens enable safe and easy cleaning from inside your home.
- They also adapt to European style PVC double glazed windows which do not have screen provisions.
- Choice of colours
- Variable hinge system
- Strengthened corners for easy removal and durability
