

PREMIUM | EASY GLIDE | WIDE OPENING | CUSTOM MADE  
**RETRACTABLE SCREEN SYSTEM**

A premium retractable screen system with patented technology for sleek and seamless operation, the ZLX by Freedom Retractable Screens is an industry leading solution for various door types and sizes. Spanning openings between 0.8m to 13m wide using a double screen with standard mesh, or up to 6.5m wide using a single screen in standard mesh, and up to 3.2m high, ZLX provides a stable and highly aesthetic solution for gaining air-flow while managing insect control. Captured mesh technology creates durability of the system while the patented auto brake feature allows the screen to stop at any position without compromise. Effortlessly easy to slide, the latching system secures the screen in place when in use, and provides a complete clear view when retracted and not in use.

# Industry Leading Retro-Fit Experts

## ZLX | DESIGNED FOR LONGEVITY

Freedom Retractable Screens is the industry leader for retrofit retractable screens on new and existing buildings. Providing style and cutting edge technology, we supply screens to over ten countries throughout Australasia, Europe, North America, and the Middle East.

Our product design team ensure that our screens are created to withstand daily use over multiple years and meet the aesthetics required for your home. We apply wind tests, static load weight pressure tests, and use high quality materials to manufacture products designed to last.

The ZLX low-profile track eliminates trip hazards and the patented brake system avoids spring backs common on other brands. The ZLX is easy to operate, glides smoothly across large openings and stores neatly when not in use.
